

Better informed means better care

Dorset Care Record brings all your health details together so medical and social care staff **can give you the best possible care**

Allergies in the DCR

For more information please visit:
news.dorsetcouncil.gov.uk/dcr-staff-area

Allergies

The **DCR** has information on **Allergies and Adverse reactions** from the following Partners:

- **Dorset County Hospital** - Examples allergies shared from DCH include Hay fever, Latex, House dust, Bees and Wax and Adhesives. **Please note** that the DCR only receives a summary of the allergies and adverse reactions when a patient is discharged from an inpatient stay so there may be some information available in the DCH source system but not in the DCR.
- **University Hospitals Dorset**
- **NHS Dorset/GP practices**

Please note

- The DCR may display conflicting allergy information, where information from one partner's system differs to another's.
- The DCR cannot differentiate between an allergy and an intolerance. The **reaction** should provide additional information.
- The list of displayed allergy and intolerances could include drug, non-drug (e.g. latex) and food, but it is not possible to list or group by these types.
- There may be Allergies/Adverse Reactions recorded in the **Dorset HealthCare** system but this data is not currently fed through to the **DCR**. Therefore, on the **Summary tab under the Community folder, in the Summary Views**, it currently states **No Allergies recorded for this patient**, but this refers to not recorded in the DCR only.

Where in the DCR you can find Allergies/Adverse Reactions

The following tabs display the same Allergies and Adverse Reactions data from the acute hospitals ([Dorset County Hospital](#) and [University Hospitals Dorset](#)) for ease of use.

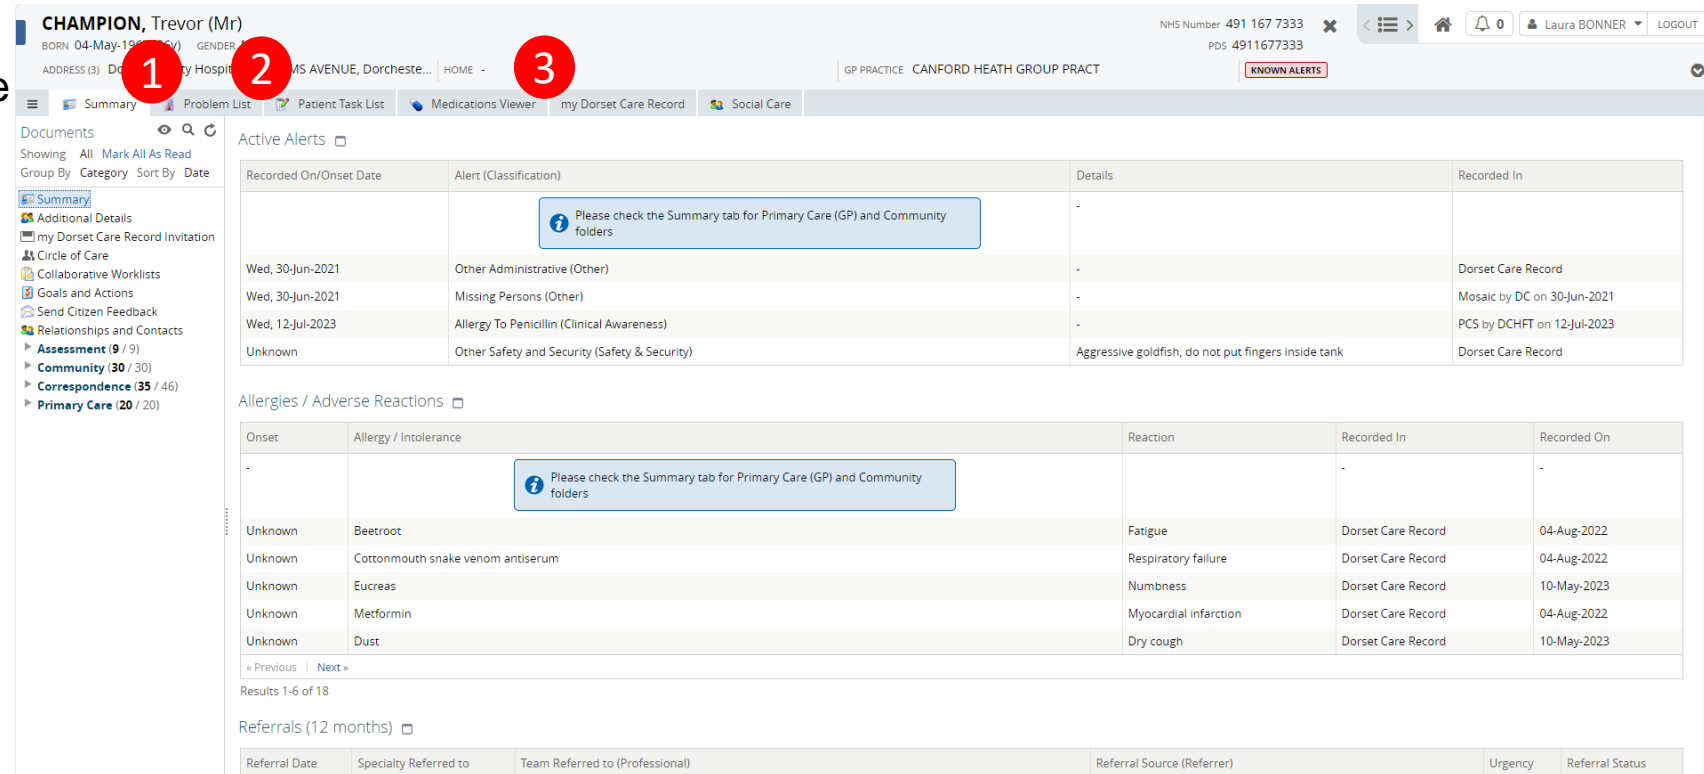

1 Summary tab on the front screen (which can be maximised for more info).

2 Problem List Tab

3 Medications Viewer Tab

In addition, there is Allergies and Adverse Reactions data from [NHS Dorset/GPs](#) on

1 Summary tab under **Primary Care** (Allergies & Adverse Reactions).

1. Allergies and Adverse Reactions from the acutes on the Summary Front Screen

The list of allergies on the **Summary Front Screen** is sorted by the **Onset date** of the allergy. It also shows the **Allergy/Intolerance** and whilst the DCR cannot differentiate between an allergy and an intolerance, the **Reaction** should provide additional information. In the next column, you can see the source system where the allergy was first **Recorded in**.

You can change the ordering by clicking on any of the column headings, and this may be particularly useful when information comes in from multiple source systems.

Please note that although the range of allergies includes drug/non-drug/food allergies and intolerances, unfortunately we cannot list or group allergies by these categories.

Disclaimer

The screenshots in this training guide are taken from a test system and as such may vary slightly to the live DCR system.

Screenshots in this training guide do not contain any real patient data.

Data provided by source systems is read-only in DCR. There are various level of restrictions and sensitivities being applied within the Partner's systems, and the DCR respects and displays the data as provided by the Partners.

The information contained within the NHS Dorset system (the Spine) is the overriding system for updating demographics.
